---

Katrina,

I kind of figured that the remediation of this project was still out a bit and I ultimately hate the flounder effect myself of contacting people without knowing them first. So I can legitimately say thank you so much not only the response but the opportunity to look in at this project and possibly work with you all. Please feel free to contact me if you have questions or need lunch sometime after all Dallas is close to everything.

Thanks so much again,

Marc Donnot

**Subject:** RE: Bristow Creek/Wilcox oil company superfund site

Marc, I have forwarded your information to Teri McMillan who is the contractor for EPA on this project. Since you are a remediation company, any site activity related to that expertise will not occur for another 2 to 3 years. I can add your contact information to the mailing list so that you can stay updated on site progress.

Thank you for your interest.

Bill, Please add Marc to the mailing list.

Katrina & Todd,

I would like to introduce myself before I call and interrupt your busy schedules and hope that this email reaches you all. AES is a reasonably new remediation company that is a true Oklahoma based company, even though we only been I business since 2012 We have been very success full on the low lying fruit projects that we have been able to chase down and have completed the:

2012	<b>Kerr-McGee Remedial Action</b>	
	<b>Cleveland, OK</b>	
	Contract Amount:	\$3,700,000.00
	Owner:	Multi-State Trust Ty Griffith 24126 SE 16 <sup>th</sup> Place. Sammamish, WA 98075 (425) 281-9185
	Engineer:	APEX Companies Ned Young 4608 South Garnett Road Suite 100 Tulsa, OK 74146 (918) 610-3543
	Description:	Remediation of 86,000 tons of lead and hydrocarbon impacted soils. Blending of 30,000 cubic yards of hazardous lead impacted soil, rendering the waste non-hazardous for disposition to local Subtitle D landfill.

AES has been proactive in hiring some strong individuals that allow us to perform at the highest level with this and being a local contractor we would love the opportunity to be part of the process. I would love to sit down with the either of you or both and discuss opportunities here or on something else that might allow us the opportunity to show you how are performance is. Please feel free to respond by email and let me know if we can pursue a conversation.

Attached is a list of our project list for review.

Sincerely,

Marc Donnot
